

# Year Eight Languages

## Extended Learning Activities

Don't forget you can download the linguascope app for free!

User: NewmillsMFL Password: languages4

[www.linguascope.com](http://www.linguascope.com) is a great place to remind yourself of all of the basics you have learned in class. Play games to revise food, countries, and much more!

Find out about traditional food in France or Germany. Have a go at making it with your family and friends, and learn what the ingredients are called!

Watching a film is a fun way to learn more vocabulary. Watch *Le Petit Prince* or *Un monstre à Paris*. Put the subtitles on and see what you can understand!

Try to write your own fairy tale! Describe the characters, and practise using the past tense to narrate the story. Don't forget the pictures!

Music is a fantastic way to learn about another country's culture. Listen to French / German music when you do your languages homework!

Reading is the best way to improve your vocabulary. Children's books are brilliant for language-learners as they are simple and the pictures are helpful!

Put post-it notes all around your house to label objects in French or German. You will be surprised how quickly you remember the words!

Look at places you can go on holiday in a French- or German-speaking country. Make a booklet advertising what you can do there and show your teacher!

Connectives such as *however*, *since*, and *also* are great ways to make your sentences longer and more impressive. Write a poem or song to help you learn some!
