

REVISION SKILLS AND TECHNIQUES

Y11 PIE 2018

How?

There are a number of great ways to revise, some of which have been shared with you tonight. They include (but are not limited to):

- Mindmapping
- Mnemonics
- Flashcards
- Creation of Patterns
- Killer Tests
- 9 Topic Matrix

When?

Although there is no time of day proven to be better for revision, it has been proven that keeping a set schedule (such as 6.30pm every night) does help your brain prepare to take in information. Students should have already started revising in their own time to prepare for the exams ahead.

Where?

If possible, keep a tidy, calm and quiet space in your home where students can study- preferably with a desk or table. Students are also welcome to use spaces such as the library after school in order to complete revision.

Timetables

All students have been given and asked to complete a revision timetable in the run up to the mock exams. This can also be a tool for parents to see if students are doing the revision scheduled. We would recommend that students put their timetables up at home and maybe take a picture on their phone so that they do have constant access to it.

Websites & Videos

Students have access to websites that will help them revise, some of which are listed below:

www.educake.co.uk

www.doddle.co.uk

www.mymaths.co.uk

<https://www.bbc.com/bitesize>

There are also lots of accessible resources on websites such as YouTube which advise students how best to revise/ handy tips and tricks.

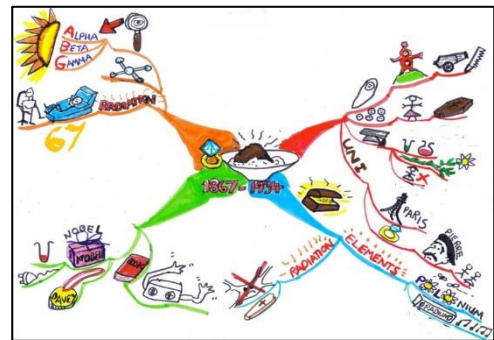

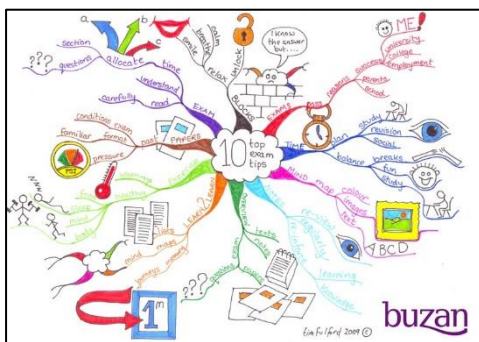

Patterns

Create patterns that will help you to remember

Mindmaps

Create intricate mindmaps, include illustration, colours and limited words.

Revisit Mnemonics

- Simile
- Hyperbole
- Alliteration
- Metaphor
- Personification
- Onomatopoeia
- Oxymoron
- Sibilance

Flashcards
