Safe Use of Artificial Intelligence (AI) Policy

Revision	Authorised by	Date	Adopted by	Date
New	A Musgrove	November 2025	RAP_25/26_008	20/11/2025

Revision	Date	Description of Changes
New	November 2025	New School Policy being adopted

Signed: Date:
 ...20/11/2025.....
 Chair of Governors

Statement of intent

1. [Legal framework](#)
2. [Roles and responsibilities](#)
3. [Data protection and cyber-security](#)
4. [Using AI tools](#)
5. [Misusing AI tools](#)
6. [Exams and assessments](#)

7. [Safeguarding](#)
8. [Teaching pupils about the safe use of AI](#)
9. [Monitoring and review](#)

Statement of intent

'Within New Mills School we will adopt AI intentionally in order to enhance learning and operational outcomes, whilst creating strong and continuously assessed safeguards to ensure safe, fair, accurate and ethical use'

At New Mills School, we recognise that the use of artificial intelligence (AI) can help to positively affect teacher workload, develop pupils' intellectual capabilities and prepare them for how emerging technologies will change workplaces. While there are many benefits to the use of AI tools, the content they produce may not always be accurate, safe or appropriate, and could lead to malpractice.

Through the measures outlined in this policy, the school aims to ensure that AI is used effectively, safely and appropriately to deliver excellent education that prepares our pupils to contribute to society and the future workplace.

For the purposes of this policy, the following terms are defined as:

- **AI** – The theory and development of computer systems able to perform tasks normally requiring human intelligence, e.g. visual perception, speech recognition, decision-making.
- **Generative AI** – A category of AI algorithms that generate new outputs based on the data they have been trained on.
- **Misuse of AI** – Any use of AI which means that pupils have not independently demonstrated their own attainment.
- **Pupils** – In this policy, the word 'pupils' is synonymous with 'students'.

1. Legal framework

The UK Online Safety Act 2023 is designed to make the internet safer, particularly for children and vulnerable users, by regulating online content and holding tech companies accountable for harmful material. It is still yet to be fully understood where there may be gaps in regulation to protect children and young people from possible harm caused by AI. Ofcom is the online safety regulator in the UK and is responsible for publishing codes of practice and guidance on how companies can comply with their duties.

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Data Protection Act 2018
- The UK General Data Protection Regulation (UK GDPR)
- DfE (2025) 'Keeping children safe in education 2025'
- DfE (2023) 'Generative artificial intelligence in education'
- DfE (2024) 'Meeting digital and technology standards in school and colleges'
- Ofsted (2024) 'Ofsted's approach to artificial intelligence (AI)'
- DfE (2024) 'Using technology in education'
- DfE (2024) 'Generative AI in education: user research and technical report'
- DfE (2024) 'Generative AI in education: educator and inspector views'
- NCSC (2024) 'AI and cyber security: what you need to know'
- NCSC (2024) 'Machine learning principles'
- JCQ (2023) 'Artificial Intelligence (AI) Use in Assessments: Protecting the Integrity of Qualifications'
- JCQ (2023) 'Suspected Malpractice Policies and Procedures'

This policy operates in conjunction with the following school policies:

- Acceptable use of IT Advice and Guidance 2023
- Ready to Learn Behaviour Policy
- Child Protection and Safeguarding Policy

1.1 Policy Statements

- The school acknowledges the benefits of the use of AI in an educational context - including enhancing teaching and learning and outcomes, improving administrative processes, reducing workload and preparing staff and learners for a future in which AI technology will be an integral part. Staff are encouraged to use AI based tools to support their work where appropriate, within the frameworks provided below and are required to be professionally responsible and accountable for this area of their work.
- We will comply with all relevant legislation and guidance, with reference to guidance contained in Keeping Learners Safe
- We will provide relevant training for staff and governors in the potential risks of AI. We will support staff in identifying training and development needs to enable relevant opportunities.

- We will ensure that, within our education programmes, learners understand the ethics and use of AI and the potential benefits and risks of its use. The school recognises the importance of equipping learners with the knowledge, skills and strategies to engage responsibly with AI tools.
- As set out in acceptable use agreements, the school will use AI responsibly and with awareness of data sensitivity. Where used, staff should use AI tools responsibly, ensuring the protection of both personal and sensitive data. Staff should only input anonymized data to avoid the exposure of personally identifiable or sensitive information.
- Staff should always ensure AI tools used comply with UK GDPR and other data protection regulations. They must verify that tools meet data security standards before using them for work related to the school.
- Only those AI technologies approved by the school may be used (Microsoft 365 Copilot). Staff should always use school-provided AI accounts for work purposes. These accounts are configured to comply with organisational security and oversight requirements, reducing the risk of data breaches.
- We will protect sensitive information. Staff must not input sensitive information, such as internal documents or strategic plans, into third-party AI tools unless explicitly vetted for that purpose. They must always recognize and safeguard sensitive data.
- The school will ensure that when AI is used, it will not infringe copyright or intellectual property conventions – care will be taken to avoid intellectual property, including that of the learners, being used to train generative AI models without appropriate consent.
- AI incidents must be reported promptly. Staff must report any incidents involving AI misuse, data breaches, or inappropriate outputs immediately to the relevant internal teams. Quick reporting helps mitigate risks and facilitates a prompt response.
- We are aware of the potential risk for discrimination and bias in the outputs from AI tools and have in place interventions and protocols to deal with any issues that may arise. When procuring and implementing AI systems, we will follow due care and diligence to prioritise fairness and safety.
- AI tools may be used to assist teachers in the assessment of certain aspects of learner’s work and the identification of areas for improvement. Teacher may use AI tools to mark fact-based responses to objective questions, maximising time to support learners individually. Use of these tools should be purposeful, considered and with a clear focus on ensuring impact and understanding and mitigating risk
- We will prioritise human oversight. AI should assist, not replace, human decision-making. Where AI has been used to provide qualitative feedback, staff must ensure that final judgments, particularly those affecting people, are made by humans and critically evaluate AI-generated outputs. They must ensure that all AI-generated content is fact-checked and reviewed for accuracy before sharing or publishing. This is especially important for external communication to avoid spreading misinformation.
- Improper use of AI tools, including breaches of data protection standards, misuse of sensitive information, or failure to adhere to this agreement, will be subject to disciplinary action as defined in Staff Disciplinary Policy.

2. Roles and responsibilities

The Governing Board will be responsible for:

- Ensuring that this policy is effective and complies with relevant laws and statutory guidance.
- Reviewing this policy on an annual basis.
- Ensuring their own knowledge of the use of AI tools in the school is up-to-date.
- Ensuring all staff undergo child protection and safeguarding training, including online safety, at induction and at regular intervals.
- Ensuring the school follows the DfE's digital and technology standards.

The headteacher will be responsible for:

- Ensuring that the policy is reviewed on an annual basis.
- Ensuring that staff receive regular, up-to-date training on how to use AI tools in school.
- Ensuring that the use of AI tools in the school is integrated into relevant policies and procedures, the curriculum and staff training.
- Communicating with parents to ensure they are kept up-to-date with how AI tools are being used in the school, how this will impact pupils' education and how the school is ensuring the tools are being used safely and effectively.
- Working with the governing board to review and update this policy on an annual basis.
- Ensuring that AI practices are audited and evaluated on a regular basis.
- Ensuring that the use of AI tools is taken into consideration when creating policies and procedures regarding online safety, child protection and safeguarding, and data protection.

ICT technicians will be responsible for:

- Providing technical support in the development and implementation of the school's AI practice.
- Implementing appropriate security measures.

The DPO (Data Protection Officer) will be responsible for:

- Keeping up-to-date and informed with AI technologies relevant to the school.
- Understanding and maintaining awareness of what the use of AI means for data protection in the school.
- Advising the school on how to integrate the use of AI while complying with data protection regulations.

The DSL (Designated Safeguarding Lead) will be responsible for:

- Taking the lead responsibility for online safety in school.
- Undertaking training so they understand the risks associated with using AI tools in school.
- Liaising with relevant members of staff on online safety matters.
- Maintaining records of reported online safety concerns relating to the use of AI tools, as well as the actions taken in response to concerns.
- Reporting to the governing board about the use of AI how it links to safeguarding.

All staff members will be responsible for:

- Adhering to the Acceptable Use Agreement and other relevant policies.
- Taking responsibility for the security of the AI tools and data they use or have access to.
- Modelling good online behaviours when using AI tools.
- Maintaining a professional level of conduct in their use of AI tools.
- Having an awareness of the risks that using AI tools in school poses.
- Reporting concerns in line with the school's reporting procedure.
- Where relevant to their role, ensuring the safe and effective use of AI tools in their teaching of the curriculum.
- Familiarising themselves with any AI tools used by the school and the risks they pose.

Pupils will be responsible for:

- Adhering to the Acceptable Use Agreement and other relevant policies.
- Seeking help from the relevant school staff if they are concerned about an experience that they or a peer has experienced while using AI tools.
- Reporting concerns in line with the school's reporting procedure.
- Familiarising themselves with any AI tools used by the school and the risks they pose.

Parents and carer:

We work hard to engage parents and carers by:

- sharing newsletters
- sharing information online e.g., website, social media
- providing curriculum information

Our parents and carers are made aware of how AI is used in school and receive guidance on both good practice in its use and the risks of misuse that may affect their childrens' learning or safety. They are encouraged to report any concerns to the school and are made aware that all incidents will be handled with care and sensitivity.

3. Data protection and cyber-security

The school is aware of the data privacy and cyber-security implications that come with using generative AI tools and will ensure that all AI tools are used in line with the school's Acceptable Use of IT Policy and the Child Protection and Safeguarding Policy. The school will follow the procedures in these policies to continue to protect pupils from harmful online content that could be produced by AI tools.

Staff will not enter data that is classed as personal and sensitive into AI tools under any circumstances. Any data entered will not be identifiable.

New Mills School ensures that staff and students are aware that generative AI tools are able to create believable content of all kinds, for example credible email scams requesting payment, and that the content AI produces may seem more authoritative and believable than usual scams. All staff will apply their best judgement and common sense to manage cyber-security risks effectively and ensure that the DfE's [cyber standards](#) are followed at all times.

The school will:

- Protect personal and special category data in accordance with data protection legislation.
- Not allow or cause intellectual property, including pupils' work, to be used to train generative AI models, without appropriate consent or exemption to copyright.
- Review and strengthen cyber security by referring to the DfE's cyber standards.
- Be mindful that generative AI could increase the sophistication and credibility of cyber-attacks.
- Ensure that pupils are not accessing or creating harmful or inappropriate content online, including through AI tools.
- Refer to the DfE's [Filtering and monitoring standards for schools and colleges](#) to ensure that the appropriate systems are in place.
- Be mindful of the data privacy implications when using AI tools and will take steps to ensure that personal and special category data is protected in accordance with data protection legislation.

If it is necessary to use personal and special category data in AI tools, the school will ensure that the tools comply with data protection legislation and existing privacy policies to protect the data.

The school will be open and transparent whilst ensuring that data subjects understand their personal or special category data is being processed using AI tools.

Responding to an incident or disclosure

Our response is always based on sound safeguarding principles and follows safeguarding and disciplinary processes. It is calm, considered and appropriate and puts the learner at the centre of all decisions made.

- All AI incidents (including data breaches and/or inappropriate outputs) must be reported promptly to the relevant internal teams. Effective reporting helps mitigate risks and facilitates a prompt response.
- Where relevant / required incidents will be reported to external agencies e.g., Police, LADO, DPO, ICO.
- All AI related incidents will be recorded through the school's normal recording systems

In the case of misuse of AI by staff, the normal staff disciplinary processes will be followed.

4 Education

Our school's educational approach seeks to develop knowledge and understanding of emerging digital technologies, including AI.

This policy outlines our commitment to integrating Artificial Intelligence (AI) responsibly and effectively within our school environment. We will use AI responsibly, safely and purposefully to support these aims:

Teaching about the safe and appropriate use of AI will ensure that pupils benefit from a knowledge-rich curriculum which enables them to become well-informed users of technology with an understanding of its impact on society. Pupils will gain strong foundational knowledge which ensures they are developing the right skills to make the best use of AI tools.

The school will:

- Prepare pupils for changing workplaces.
- Teach pupils how to use emerging technologies, including AI tools, safely and appropriately.
- Raise awareness of the limitations, reliability and potential bias of AI tools.
- Help pupils to understand how information on the internet is organised and ranked.
- Include online safety teaching in the curriculum and how to protect against harmful or misleading content.
- Raise awareness and understanding of protecting intellectual property rights.
- Encourage the safe and responsible use of digital content.
- Teach about the impact of technology, including disruptive and enabling technologies.
- Include teaching about how computers work, connect with each other, follow rules and process data in the curriculum.

Pupils will be supported to identify and use appropriate resources to support their ongoing education using age-appropriate resources, which may include AI tools, whilst preventing over-reliance on a limited number of tools or resources.

5. Using AI tools

The school will ensure that AI tools are used appropriately to achieve the following aims:

- To reduce workload
- To free up teachers' time
- To assist with the production of high-quality and compliant administrative plans, policies and documents
- To support the teaching of a knowledge-rich computing curriculum
- To teach pupils:
 - How to use emerging technologies safely and appropriately.
 - About the limitations, reliability and potential bias of AI tools.
 - How information on the internet is organised and ranked.
 - How online safety practices can protect against harmful and misleading content.
 - To identify and use appropriate resources to support their education, including age-appropriate resources and preventing over-reliance on a limited number of tools or resources.

Whilst recognising that AI tools can be used appropriately and with benefit to teaching and learning, the school will keep in mind that the content produced by AI tools can be:

- Inaccurate.
- Inappropriate.
- Biased.

- Taken out of context and without permission.
- Out of date or unreliable.

Where AI tools are used to produce administrative plans, policies and documents, all staff members will understand that the quality and content of the final document remains the professional responsibility of the staff member who produced it. Staff members using AI tools to create documents will not assume that AI output will be comparable with a human-designed document that has been developed in the specific context of the school.

Pupils will be made aware of the importance of referencing AI tools correctly when using AI tools to produce work, especially if the work is for an assessment, to allow teachers and assessors to review how AI has been used and whether it was appropriate. Pupils' references to AI sources will show the name of the AI source and the date that the content was generated.

Pupils will retain a copy of the questions and AI generated content for reference and authentication purposes in a non-editable format, e.g. a screenshot. Pupils will also provide a brief explanation of how AI tools have been used.

When using AI tools, staff and pupils will ensure that any content produced is scrutinised and cross-checked for its appropriateness and accuracy.

Staff members will be aware that AI tools return results based on the dataset it has been trained on – it may not have been trained on the national curriculum and may not provide results that are comparable with a human-designed resource developed in the context of the national curriculum. Staff members will be mindful of this in their teaching and marking of pupils' work.

Pupils and staff members will be reminded that using AI tools cannot replace the judgement and deep subject knowledge of a human expert. Staff members will stress the importance of pupils acquiring their own knowledge, expertise and intellectual capability rather than relying on AI tools in their work.

The school will not allow or cause pupils' original work to be used to train AI tools unless it has appropriate consent or exemption to copyright. Consent for pupils under 18 will be sought via their parents.

6. Training

As AI becomes an integral part of modern education, it is essential for staff to be trained in its effective use. Training equips educators with the knowledge and skills to integrate AI tools responsibly into teaching, learning, and administrative processes. It ensures that AI is used to enhance educational outcomes, streamline workloads, and promote equity while safeguarding ethical practices and data privacy. By fostering AI literacy, staff can confidently prepare pupils for a future where AI is a key driver of innovation and opportunity.

- We will provide training to all staff on the effective, responsible, and ethical use of AI technologies in education, ensuring these tools enhance teaching, learning, and administrative processes.

- We will integrate AI-related risks and safeguards into annual safeguarding training, aligning with statutory guidance, including "Keeping Children Safe."
- We will ensure staff identify, assess, and mitigate risks associated with AI technologies, including issues such as biased algorithms, privacy breaches, and harmful content.
- We will train staff on robust data protection practices, ensuring compliance with UK GDPR and other relevant regulations while using AI systems.
- We will promote ethical practices in the use of AI, ensuring that these technologies contribute to equity, fairness, and inclusivity in education.
- We will empower staff to teach learners about the safe and ethical use of AI, cultivating a culture of awareness, resilience, and informed decision-making in the digital age.

7. Misusing AI tools

Preventing misuse

The school acknowledges that misuse of AI tools can happen both accidentally and intentionally, and that education and awareness is key to preventing misuse. The school will consider taking the following actions to prevent the misuse of AI tools:

- Restricting access to online AI tools on school devices and networks, especially on devices used for exams and assessments
- Setting reasonable deadlines for submission of work and providing pupils with regular reminders
- Allocating time for sufficient portions of pupils' work to be completed in class under direct supervision, where appropriate
- Examining intermediate stages in the production of pupils' work to ensure that work is being completed in a planned and timely manner, and that work submitted represents a natural continuation of earlier stages
- Introducing classroom activities that use the level of knowledge and understanding achieved during lessons to ensure the teacher is confident that pupils understand the material
- Engaging pupils in verbal discussions about their work to ascertain that they understand it and that it reflects their own independent work
- Refusing to accept work that is suspected to have been generated through misuse of AI tools without further investigation
- Issuing tasks which are, wherever possible, topical, current and specific, and require the creation of content which is less likely to be accessible to AI models
- Investing in educating and training staff, pupils and parents on the use of AI tools and raising awareness of the risks and issues that come with its use

Identifying misuse

Staff members will continue to use the skills and observation techniques already in use to assure themselves that pupils' work is authentically their own when attempting to identify a misuse of AI tools.

When reviewing pupils' work to ensure its authenticity, staff members will compare it against other work created by the pupil. Where the work is made up by writing, the staff members will make note of:

- Spelling and punctuation.
- Grammatical usage.
- Writing style and tone.
- Vocabulary.
- Complexity and coherency.
- General understanding and working level.
- The mode of production, i.e. whether the work was handwritten or word-processed.

Staff members will be aware of and look out for potential indicators of AI use, which include:

- The speed with which online homework/assessments are completed. For example, completing complex maths questions in seconds would indicate a use of AI.
- A default use of American spelling, currency, terms and other localisations.
- A default use of language or vocabulary which might not appropriate to the working or qualification level.
- A lack of direct quotations and/or use of references where these are required or expected.
- Inclusion of references which cannot be found or verified.
- A lack of reference to events occurring after a certain date, reflecting when an AI tool's data source was compiled.
- Instances of incorrect or inconsistent use of first-person and third-person perspective where AI generated text has been left unaltered.
- A variation in the style of language evidenced in a piece of work, if a pupil has taken specific portions of text from an AI tool and then amended it.
- A lack of graphs, data tables or visual aids where these would normally be expected.
- A lack of specific, local or topical knowledge.
- Content being more generic in nature.
- The inadvertent inclusion of warnings or provisos produced by AI tools to highlight the limits of its ability or the hypothetical nature of its output.
- The submission of pupil work in a typed format, where this is not usual, expected or required.
- The unusual use of several concluding statements throughout the text, or several repetitions of an overarching essay structure within a single lengthy essay.
- The inclusion of confidently incorrect statements within otherwise cohesive content.

Staff members will remain aware that AI tools can be instructed to employ different languages and levels of proficiency when generating content, and some are able to produce quotations and references.

Where necessary, the school will make use of the following programmes and services that are able to analyse content and determine the likelihood that it was produced by AI:

- [OpenAI Classifier](#)
- [GPTZero](#)
- [The Giant Language Model Test Room \(GLTR\)](#)

8. Exams and assessments

The school will continue to take reasonable steps where applicable to prevent malpractice involving the use of generative AI tools regarding exams and assessments. School will follow the all internal exam policies and will ensure that these policies address the appropriate and inappropriate use of AI tools.

9. Safeguarding

The school acknowledges that generative AI tools can be used to produce content that is dangerous, harmful, and inappropriate. The school will follow the procedures set out in the Child Protection and Safeguarding Policy and the Online Safety Policy to ensure that pupils are not able to access or be exposed to harmful content.

Pupils will be taught about the risks of using AI tools and how to use them safely. Pupils will be made aware of how to report any concerns or incidents involving generative AI, and who to talk to about any issues regarding the use of AI tools.

The school will engage with parents when necessary to inform them of the safeguarding risks that come with using AI tools, and how the school is protecting pupils online. The school will ensure that parents are aware of who to speak to about any concerns or issues regarding the use of AI.

The school will ensure that the appropriate filtering and monitoring systems are in place to protect pupils online, following the DfE's [filtering and monitoring standards](#).

All staff members will receive training on the safe use of AI as part of their online safety training, which is regularly updated.

10. Monitoring and review

The Governing board and Headteacher will review this policy in full on an **annual** basis and following any incidents that occur due to the use of AI tools, e.g. data protection or cyber-security.

The next scheduled review date for this policy is **November 2026**

Any changes made to this policy are communicated to all members of the school community.
