Chemistry topic C1: Atomic structure

| | • |
|--------------|---|
| 1. Keywords | |
| 1. Atom | The smallest possible piece of an element. Has a radius of 0.1nm (or 1x10 ⁻¹⁰ m) |
| 2. Element | A substance in which all the atoms have the same atomic number |
| 3. Isotope | Atoms with the same number of protons but different numbers of neutrons |
| 4. Molecule | Two or more atoms bonded together |
| 5. Compound | Two or more <u>different</u> atoms bonded together |
| 6. Mixture | At least two different elements or compounds together. Can be separated easily |
| 7. Nucleus | The centre of an atom. Contains protons and neutrons |
| 8. Proton | A positively charged particle found in the nucleus |
| 9. Neutron | A neutral particle found in the nucleus. Has no charge |
| 10. Electron | A negatively charged particle found in energy levels (shells) around the nucleus |

| 5. History of the atom | | | |
|----------------------------|-------------------|--|---------|
| Discovery | Ву | Model | Diagram |
| Solid particle called atom | John Dalton | Particle: solid spheres | 1 |
| The electron | JJ Thompson | Plum pudding: positive 'cake' with negative 'plums' | 2 |
| Nucleus Rutherford | | Nuclear: Positive nucleus surrounded by electrons | 3 |
| Neutron | James Chadwick | Nuclear: Now with protons and neutrons in nucleus | 3 |
| Energy levels (shells) | Niels Bohr | Planetary: Electrons now 'orbit' in different shells | 4 |

8. Isotopes have the same numbers of protons and electrons but different numbers of neutrons.

| electronic structure. | | |
|-----------------------|--------------------|--|
| Н | В | |
| 1 hydrogen | 2, 3 boron | |
| 2,6 oxygen | 2,8,3 aluminium | |
| 2,8,8 argon | 2,8,8,2 calcium | |

9. Writing and drawing the

| 6. Properties of sub-atomic particles | | | | |
|---------------------------------------|------------------|--------------------|----------|--|
| Particle | Relative mass | Relative charge | Location | |
| Proton | 1 | +1 | Nucleus | |
| Neutron | 1 | 0 | Nucleus | |
| Electron | 0 | -1 | Shells | |

| relative atomic mass | | |
|------------------------|--|--|
| atomic symbol | | |
| name | | |
| atomic (proton) number | | |

Key

1 H hydrogen 1

| | 7. Using the periodic table | | |
|---|-----------------------------|---|----------------------------------|
| | Number of | Is the | Found by |
| | Protons | Atomic (proton) number | Smaller number on periodic table |
| | Electrons | Atomic (proton) number | Smaller number on periodic table |
|] | Neutrons | Difference between the atomic mass and atomic number | Big number – small number |

10. Electron arrangement rules

- Always fill from the inside to the outside
- 2. The first shell can only hold 2 electrons
- 3. The second and third can hold 8
